## Adjacent Angles

Look at the figure and find the measures of the indicated angles.

3) If $\mathrm{m} \angle \mathrm{SOQ}=109^{\circ}$, and $\mathrm{m} \angle \mathrm{SOR}=70^{\circ}$, what is $\mathrm{m} \angle \mathrm{ROQ}$ ?
4) What is $\mathrm{m} \angle \mathrm{ROP}$ if $\mathrm{m} \angle \mathrm{ROQ}=39^{\circ}$, and $\mathrm{m} \angle \mathrm{POQ}=41^{\circ}$ ?
5) If $\mathrm{m} \angle \mathrm{ROS}=70^{\circ}$, and $\mathrm{m} \angle \mathrm{MOS}=71^{\circ}$, what is $\mathrm{m} \angle \mathrm{MOR}$ ?
