

Pairs of Angles

Find the measure of the indicated angle in each figure.

- 1) \overleftrightarrow{JL} and \overleftrightarrow{KM} are intersecting lines.

$$m\angle KNL = \underline{\hspace{2cm}}$$

- 2) \overleftrightarrow{PR} is a straight line.

$$m\angle PQS = \underline{\hspace{2cm}}$$

3)

$$m\angle USR = \underline{\hspace{2cm}}$$

- 4) \overleftrightarrow{DF} and \overleftrightarrow{GE} are intersecting lines.

$$m\angle GHF = \underline{\hspace{2cm}}$$

- 5) \overleftrightarrow{XZ} is a straight line.

$$m\angle WYZ = \underline{\hspace{2cm}}$$

6)

$$m\angle BAD = \underline{\hspace{2cm}}$$
