

Life Cycle of a Butterfly

Read the passage and rearrange the stages in the life cycle of a butterfly in the right order.

The mother butterfly lays her eggs on a leaf. The egg stage marks the beginning of a butterfly's life cycle. When an egg hatches, out comes a small caterpillar. This is the larval stage of the cycle. The caterpillar has a voracious appetite and eats all day long. It gorges on leaves, including the one where the mother laid her eggs. As it

eats, bran hard cycle com wing
