

The Thirteen Colonies

Here's a table on population growth in colonial America, showcasing population estimates for select colonies during the 17th and 18th centuries:

Colony	Population (Approximate)	Year
Virginia	27,000	1650
		
Georgia	2,000	1730

1) Which colony had the largest population around the year 1650?

2) Which colony had the smallest population listed in the table?

The Thirteen Colonies

3) Which colony had a population of 25,000 around the year 1680?

4) Which colony had a population of 16,000 around the year 1640?

5) Name two colonies that had populations of approximately 5,000 or less during the specified years.
