

Dinosaurs

Read each paragraph and fill in the missing spaces to compare and contrast the two types of dinosaurs described.

- 1) Among dinosaurs, some were carnivores, or meat-eaters, while others were herbivores, or plant-eaters. Carnivores had sharp teeth to rip into meat, whereas herbivores had more

Carnivores
Had sharp teeth

Herbivores
Ate plants

- 3) Among carnivorous dinosaurs, there were predators and scavengers. Predators hunted and killed their prey, while scavengers consumed dead animals. Predators had forward-facing eyes, while scavengers had side-facing eyes. Most meat-eating dinosaurs both hunted and scavenged for food.

Predators
Had forward-facing eyes

Scavengers
Consumed dead animals
