

Rearranging Equations

Make x the subject in each problem.

1) $\frac{x}{s} = 2$

2) $13 = c - 9w + x$

3) $ax + u = 4$

4) $\frac{k-5}{3x} = 11$

5) $7t + 5 = x - 14$

6) $\frac{3}{4}x = 6b + 12$

7) $8 = \frac{x}{n-m}$

8) $7p + q - x = -10 + 7p$
