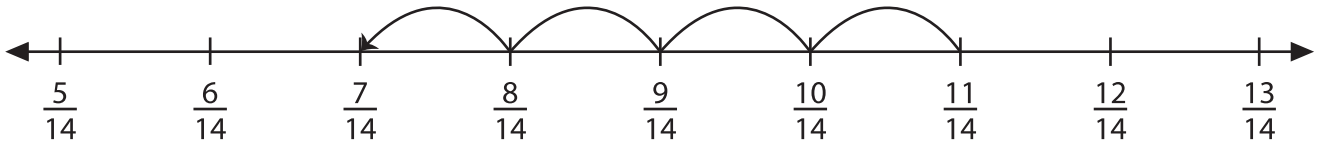
Subtracting Fractions on a Number Line

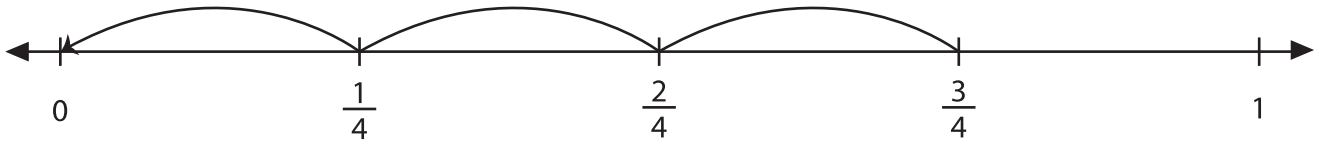
Complete each subtraction sentence using the number line.

1)



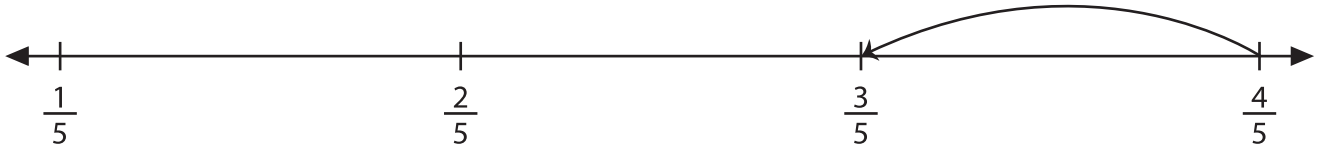
$\frac{11}{14} - \frac{4}{14} = \square$

2)



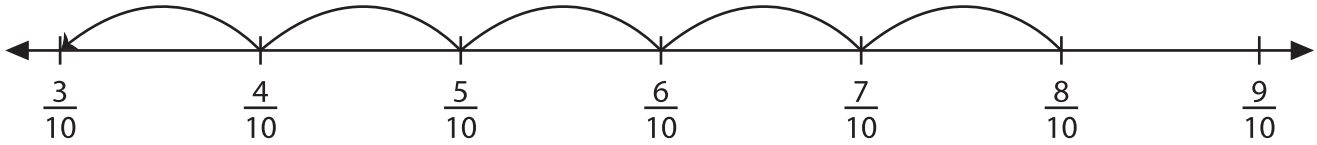
$\frac{3}{4} - \frac{3}{4} = \square$

3)



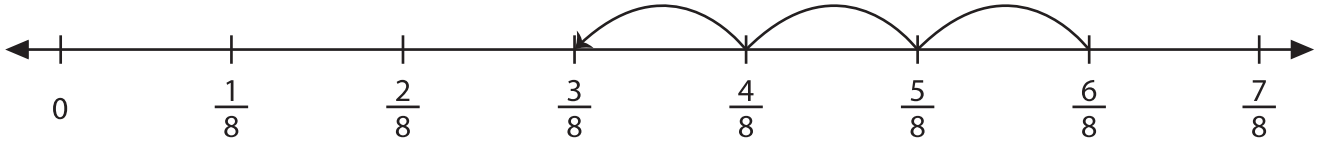
$\frac{4}{5} - \frac{1}{5} = \square$

4)



$\frac{8}{10} - \frac{5}{10} = \square$

5)



$\frac{6}{8} - \frac{3}{8} = \square$
