

Graphing Linear Equations

1) Which of the following graphs represents the equation $y = 3x - 4$?

2) Which of the following graphs represents the equation $y = -\frac{1}{2}x - 3$?

3) Which of the following graphs represents the equation $y = 6x + 1$?

4) Which of the following graphs represents the equation $y = -x - 2$?

5) Which of the following graphs represents the equation $y = \frac{1}{3}x$?
