

Graphing Linear Equations

1) Which of the following graphs represents the equation $y = 2x - 1$?

2) Which of the following graphs represents the equation $y = \frac{1}{3}x + 4$?

3) Which of the following graphs represents the equation $y = -3x - 2$?

4) Which of the following graphs represents the equation $y = \frac{2}{3}x$?

5) Which of the following graphs represents the equation $y = \frac{3}{4}x - 2$?
