

# Ocean Zones

Match each ocean zone to an appropriate piece of information.

1)

**Sunlight zone**

This zone is characterized by a steady temperature of about 39°F and extreme water pressure.

2)

3)

4)

**Abyssal zone**

This zone is a long, narrow, and steep-sided depression in the earth's crust.

5)

**Trench zone**

This zone absorbs excess greenhouse emissions from the atmosphere, acting as a carbon sink.
