

Human Body Systems and Functions

Match each human body system with its main functions. Write the corresponding letter in the space provided.

Functions	Human Body Systems
A) transports oxygen, nutrients, and hormones throughout the body	nervous system <input data-bbox="1370 520 1511 638" type="text"/>
B)	<input data-bbox="1474 703 1511 821" type="text"/>
C)	<input data-bbox="1474 886 1511 1003" type="text"/>
D)	<input data-bbox="1474 1068 1511 1186" type="text"/>
E)	<input data-bbox="1474 1251 1511 1369" type="text"/>
F) allows and supports movement through coordinated action of muscles	skeletal system <input data-bbox="1370 1449 1511 1566" type="text"/>
G) facilitates gas exchange, bringing oxygen into the body and removing carbon dioxide	endocrine system <input data-bbox="1370 1631 1511 1749" type="text"/>
H) produces and releases hormones that regulate various bodily functions	integumentary system <input data-bbox="1370 1814 1511 1932" type="text"/>
