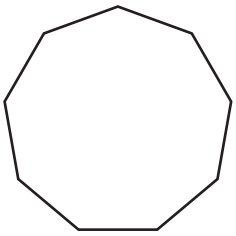
Polygons | Finding the Side Lengths

Find the side length of each regular polygon.

1)

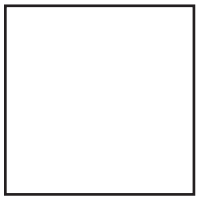


Perimeter = 90 in

Number of sides = _____

Length of each side = _____

2)

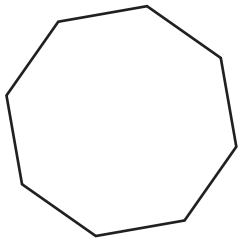


Perimeter = 124 ft

Number of sides = _____

Length of each side = _____

3)

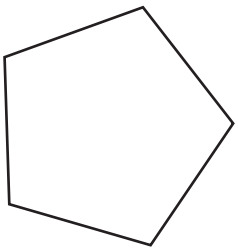


Perimeter = 72 yd

Number of sides = _____

Length of each side = _____

4)

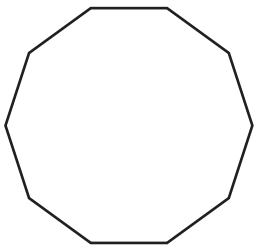


Perimeter = 35 yd

Number of sides = _____

Length of each side = _____

5)

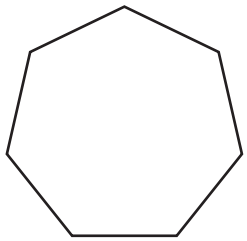


Perimeter = 220 in

Number of sides = _____

Length of each side = _____

6)

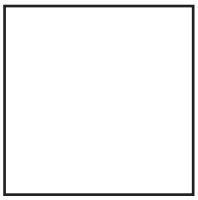


Perimeter = 112 ft

Number of sides = _____

Length of each side = _____

7)

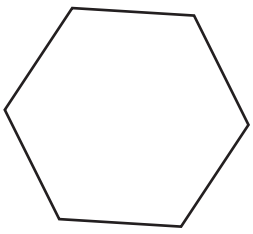


Perimeter = 160 ft

Number of sides = _____

Length of each side = _____

8)

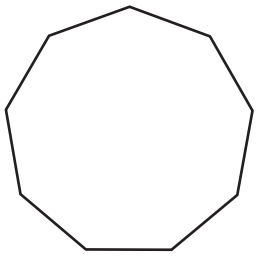


Perimeter = 204 yd

Number of sides = _____

Length of each side = _____

9)



Perimeter = 252 in

Number of sides = _____

Length of each side = _____
