

# Plant and Animal Cells

---

Identify if each statement is true or false and check the appropriate box.

- |  | True                     | False                    |
|--|--------------------------|--------------------------|
| 1) The cell membrane is a rigid outer layer that provides structural support for the cell.                     | <input type="checkbox"/> | <input type="checkbox"/> |
| 2) Mitochondria are responsible for producing energy in the form of ATP.                                       | <input type="checkbox"/> | <input type="checkbox"/> |
| 3) Ri<br>sy  | <input type="checkbox"/> | <input type="checkbox"/> |
| 4) TI<br>g   | <input type="checkbox"/> | <input type="checkbox"/> |
| 5) Ly<br>fo  | <input type="checkbox"/> | <input type="checkbox"/> |
| 6) C<br>p  | <input type="checkbox"/> | <input type="checkbox"/> |
| 7) TI<br>d   | <input type="checkbox"/> | <input type="checkbox"/> |
| 8) Vacuoles in animal cells store water and help maintain the cell shape.                                      | <input type="checkbox"/> | <input type="checkbox"/> |
| 9) The Golgi apparatus packages and modifies proteins before they are transported to their final destinations. | <input type="checkbox"/> | <input type="checkbox"/> |
| 10) Centrioles are organelles found in plant cells, and they play a role in cell division.                     | <input type="checkbox"/> | <input type="checkbox"/> |
