## Points, Lines, and Planes

A) Does each given set of points represent a plane? Check the appropriate box.
1)
-W • Y

- Z

2) 

$$
\bullet K
$$

3) 

2) A plane contains at least two non-collinear points.
3) The intersection of two planes is a point.
4) If two lines intersect, then both the lines lie on the same plane.
