Igloos have tiny windows made of clear ice blocks. These windows allow a little sunlight to enter, warming up the inside even more. The ice windows also help to control the temperature, preventing it from getting too hot or too cold.

When people gather inside an igloo, their bodies generate heat. This heat adds to the warmth already trapped inside. It's like everyone is sharing their warmth, making the igloo feel like a toasty hideaway.

# The Cozy Secrets of Igloos

---

The Inuit have been building and using igloos for generations. They understand the land and know how to make the most of what's around them. The design of an igloo is a testament to their deep understanding of survival in extreme conditions.

So, the next time you think about an igloo, remember that it's not just a simple
