saying, "Mr. Watson, come here, I want to see you."

The Early Telephones (Late 1800s)

The early telephones were simple devices with a mouthpiece and an earpiece. To make a call, you would turn a crank to signal an operator who would connect your call manually. During this time, telephones were mostly found in businesses and wealthy households.

The Evolution of the Telephone

The Rotary Dial and the Telephone Network (Early 1900s)

In the early 20th century, telephones became more widespread. Around 1904, the rotary dial was introduced, allowing people to dial numbers directly. The telephone network also expanded, connecting more and more people around the country. This period saw the birth of the "party line" where multiple households
