- 1) Condensation is the process in which water vapor in the air turns into liquid water. This happens when the air is cooled.  
①      ②      ③      ④      ⑤      ⑥
- 2) Precipitation is the process in which water falls from the sky in the form of rain, snow, or sleet.  
①      ②      ③      ④      ⑤      ⑥
- 3) Evaporation is the process in which water changes from a liquid to a gas or vapor.  
①      ②      ③      ④      ⑤      ⑥
- 4) Transpiration is the evaporation of water from the plants. Plants release excess water from their leaves in the form of vapor, or moisture.  
①      ②      ③      ④      ⑤      ⑥
- 5) Accumulation is the process in which water is collected in large bodies like lakes, ponds, and oceans.  
①      ②      ③      ④      ⑤      ⑥
- 6) Surface runoff is the excess water from rain, snow, or other sources of water that flows across the surface of the land and is not absorbed by the soil.  
①      ②      ③      ④      ⑤      ⑥
