

# Acute, Right, and Obtuse Angles

Look at each figure, check the correct option, and identify the angle as acute, right, or obtuse.

1)

 less than a right angle.

 $\angle JKL$  is  equal to a right angle.

 greater than a right angle.

 $\angle JKL$  is an \_\_\_\_\_ angle.

2)

 less than a right angle.

 $\angle BCD$  is  equal to a right angle.

 greater than a right angle.

 $\angle BCD$  is an \_\_\_\_\_ angle.

3)

 less than a right angle.

 $\angle PQR$  is  equal to a right angle.

 greater than a right angle.

 $\angle PQR$  is a \_\_\_\_\_ angle.

4)

 less than a right angle.

 $\angle XYZ$  is  equal to a right angle.

 greater than a right angle.

 $\angle XYZ$  is an \_\_\_\_\_ angle.
