

Reading and Interpreting Bar Graphs

A group of friends had gathered to watch football. They ate pizza for dinner. The bar graph shows how many slices of pizza each friend ate. Read the graph and answer the questions that follow.

1)

2) How many more slices did Rafe eat than Rob? _____

3) Name a pair of friends who ate the same number of slices. _____

4) Together, two friends ate 7 slices of pizza. Who are these two friends? _____

5) How many more slices of pizza did Jim eat than Adam? _____
