

Least Common Multiple of Two Numbers

Answer Key

Find the least common multiple of each pair of numerals.

1) 14, 20

$$\text{LCM}(14, 20) = \underline{140}$$

2) 5, 10

$$\text{LCM}(5, 10) = \underline{10}$$

3) 9, 7

$$\text{LCM}(9, 7) = \underline{63}$$

4) 12, 6

$$\text{LCM}(12, 6) = \underline{12}$$

5) 22, 2

$$\text{LCM}(22, 2) = \underline{22}$$

6) 11, 3

$$\text{LCM}(11, 3) = \underline{33}$$

7) 7, 18

$$\text{LCM}(7, 18) = \underline{126}$$

8) 3, 9

$$\text{LCM}(3, 9) = \underline{9}$$

9) 8, 16

$$\text{LCM}(8, 16) = \underline{16}$$

10) 13, 2

$$\text{LCM}(13, 2) = \underline{26}$$
