# Partitioning Shapes into Equal Parts
Answer Key

Divide the shapes into equal parts as directed. **(Illustrations may vary.)**
1) Draw lines to divide the hexagon into six triangles.
2) Draw a line to divide the circle into two semicircles.

3) Draw lines to divide the rectangle into five rectangles.

4) Draw a line to divide the rhombus into two triangles.

5) Draw lines to divide the square into four triangles.

6) Draw lines to divide the pentagon into ten triangles.
