

Reading and Interpreting Line Graphs

- 1) Roger, a food truck owner, recorded the number of grilled cheese sandwiches he sold each day over the course of a week. Read the line graph and answer the questions.

- i) On which two days did Roger sell more than 15 grilled cheese sandwiches?

- ii) How many more grilled cheese sandwiches were sold on Wednesday than on Friday?

- iii) On which day did he sell the fewest grilled cheese sandwiches?

- 2) Monica, a student who works part-time, is saving up to buy a laptop. The line graph shows the amount of money she saved every week over a period of five weeks. Read and interpret the graph.

- i) Monica saved more in week 2 than in week 3.

True

False

- ii) How much did Monica save in the 3rd week?

- iii) How much did Monica save in all?
