

Reading and Interpreting Line Graphs

Ferries of NY Waterway go on 12 trips a day across the Hudson River. The number of passengers on each trip is recorded on a line graph. Read and interpret the graph to answer the questions.

- 1) Find the total number of passengers who boarded the ferries.
- 2) How many passengers caught the 9 a.m. ferry?
- 3) How many more passengers were on board the 12 p.m. trip than on the 2 p.m. and 3 p.m. trips put together?
- 4) How many more people used the ferry service at 12 p.m. than the 2 p.m. and 3 p.m. combined?
- 5) There were fewer passengers on the 8 p.m. ferry than on the 7 p.m. ferry.

True

False
