

Finding Missing Side Lengths in Right Triangles

Answer Key

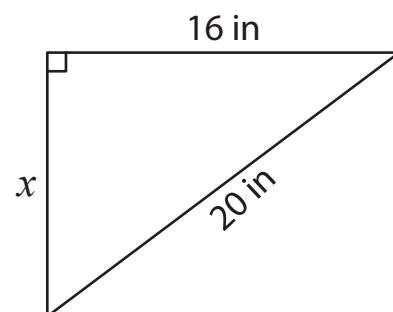

Determine the missing length in each right triangle using the Pythagorean theorem.

1)

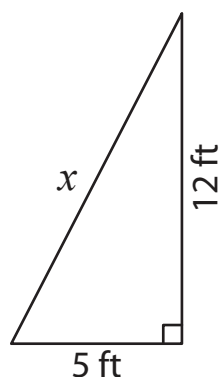

$$x = \underline{\quad 9 \text{ yd} \quad}$$

2)

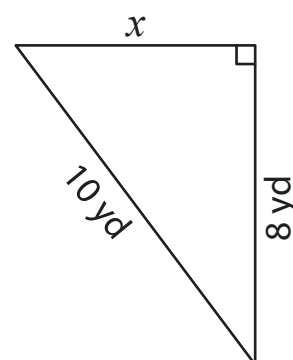

$$x = \underline{\quad 12 \text{ in} \quad}$$

3)

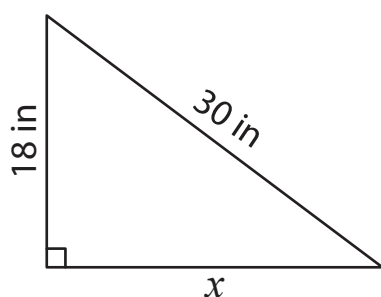

$$x = \underline{\quad 13 \text{ ft} \quad}$$

4)

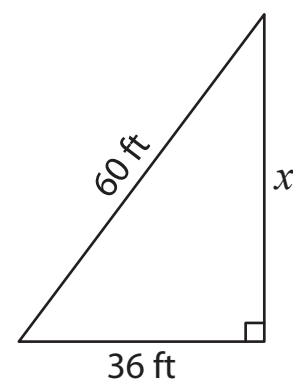

$$x = \underline{\quad 6 \text{ yd} \quad}$$

5)

$$x = \underline{\quad 24 \text{ in} \quad}$$

6)

$$x = \underline{\quad 48 \text{ ft} \quad}$$
