

Systems of Equations | Graphing

Graph each system of equation, and find the solution.

1) $y = -x - 2$; $y = -2x + 4$

2) $y = 4x + 1$; $y = 3x + 2$

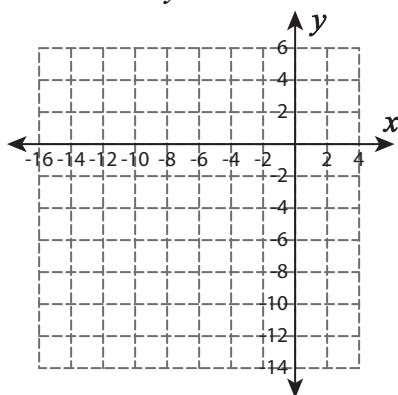

3)

5) $y = -12 - 8x$; $y = 4$

Point of intersection: _____

$x = \underline{\hspace{2cm}}$; $y = \underline{\hspace{2cm}}$

6) $y = 19 - 7x$; $y = -4x + 7$

Point of intersection: _____

$x = \underline{\hspace{2cm}}$; $y = \underline{\hspace{2cm}}$
